Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Taniuchi (US 5,901,836).

Taniuchi discloses (Fig.1) a lighting knob switch including a manipulating shaft (light conductor) [22] which is rotatable and moveable back and forth {col.2, lines 26-29} (therefore having two stable points: at an upper and at a lower positions), a display [3], a light source [35] arranged at a side of the shaft [22]. The shaft [22] has a light incident faces [21C] in direction orthogonal to an optical path from the light source and a coned light reflecting surface [22B] having a top which extends downwardly at a side thereof opposite to the incident faces [21C].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2875

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taniuchi (US 5,901,836) in view of Sato et al. (US 5,952,628).

Taniuchi discloses the instant claimed invention except for tiltably supported shaft.

Sato et al. disclose (Fig.2) a switch having tiltably supported shaft in order to obtain multiple-way operation.

It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to provide the tiltably supported shaft, as taught by Sato et al. for the device of Taniuchi in order to obtain multiple-way operation.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Tsidulko whose telephone number is (571)272-2384. The examiner can normally be reached on 8 - 5.
